Release 1.5.4

Release Information

Version	1.5.4
Date	Sep 11, 2023
Work Items	1115, 1233, 662, 1234, 1344, 619, 1357, 1231, 1232, 642, 1337, 1397, 1331, 1343, 1236

New Features

- 1115 – Added support for deletion of multiple assets
- 1233 – Added support to forward app logs to external audit / syslog server
- 662 – Added support for Periodic Automatic Discovery
- 1234 – Added support for Role based functionality disablement at the user interface.
- 619 – Added support to detect Sub modules as separate items to better detect upgrades.
- 1357 – Idle session timeout is now configurable up to 60 minutes
- 1231 – Baseline change detection alerts now contain old value and current value.
- 1232 – Audit log messages now generated when a single windows program is removed / updated.
- 642 – Added support for automated backups to local and NAS drives.
- 1337 – Added support to define custom templates for CSV asset export.
- 1331 – Asset scan now supports custom filters. i.e. Filtered assets can be scanned apart from scan and scan all.
- 1236 – Password fields are now redacted for better security during edit.

Bug Fixes

- 1344 – Idle session timeout is not working as expected.
- 1397 – Minor ui validations and notifications label corrections are performed.
- 1343 – Asset search is not working as expected in table view.

Known Issues

- Nil
